Boston, MA, USA | nikhilak@bu.edu | [LinkedIn](#) | [GitHub](#) | [Website](#)

EDUCATION

Boston University
Master's, Data Science

Sep 2025 - Present
MA, USA

- **GPA:** 4 GPA

National Institute of Technology
Bachelors, Electrical and Electronics Engineering

Aug 2019 - May 2023
Nagpur, India

- **GPA:** 7.63 CGPA

Narayana Junior College
High School, MPC

Jun 2017 - May 2019
Hyderabad, India

- **GPA:** 4 GPA

SKILLS

- **Container Orchestration & Platforms:** Kubernetes, Container orchestration, OpenShift Administration, Docker, Azure, AWS
- **DevOps & CI/CD:** CI/CD, GitHub actions, Terraform
- **Cloud, Systems & Monitoring:** Cloud Administration, IBM WebSphere Administration, Network management, Dynatrace monitoring, Linux Administration, Cloud Architecture, SRE Principles, Power BI, Troubleshooting
- **Programming Languages:** Python, C, R, SQL, Shell scripting
- **Data Analysis & Machine Learning:** Data Analysis, Scikit-Learn, Statistics, PyTorch, Log Data Analysis, Analytical Skills, Statistics

WORK EXPERIENCE

Faculty of Computing and Data Sciences - Boston University - Teaching Assistant

Jan 2026 - Present

For DS110 (Introduction to Data Science): Assisting in instruction and evaluation of over 100+ students, supporting student learning in Python programming, data structures, object-oriented programming, and data analysis with NumPy, pandas, and Matplotlib.

ICICI Bank - TechOps Engineer

Jun 2023 - Jun 2025

Led migration of iMobile Pay, a mobile app (30M+ users) to Red Hat OpenShift, enhancing cluster scalability, reliability, high availability across data centers and deployment workflows via Kubernetes-based containers. Migrated app from MobileFirst to non-MFP solution, adding frontend security layers for efficient traffic routing.

- Authored Kubernetes YAML manifests for 200+ microservices and configured logging, tracing, and monitoring in Dynatrace and Vulogx, applying SRE principles to ensure reliability and performance.
- Implemented change data capture from Oracle to Redis via Debezium in real-time, with zero downtime.
- Conducted troubleshooting of infrastructure issues during end-to-end setup in a new data center, including network components and security layers for mobile application deployment.
- Migrated app from MobileFirst to non-MFP solution, adding frontend security layers for efficient traffic routing.
- Provisioned cloud infrastructure architecture based on utilization metrics, optimized middleware, load balancing, SSL, and enhanced CI/CD pipelines using GitHub Actions and shell scripting to streamline deployments.

PROJECTS

911 Call Data Patterns Aggregator

Sep 2025 - Dec 2025

- Developing an end-to-end data pipeline for aggregating and harmonizing 911 call data from top U.S. cities to uncover patterns in police service calls, correlations with crime, fatal violence, and social determinants of health.

LALIGA Shot Data Analysis & Goal Prediction - [GitHub](#)

Oct 2025

- Analyzed LALIGA shots (2015-25 seasons) to predict goals.
- Engineered features (e.g., distance/angle from coordinates); EDA revealed rebounds as 3x conversion boosters.
- Clustered players via K-Means/PCA; built and compared predictive models including Logistic Regression, Random Forest, and XGBoost to forecast goal outcomes.

Self hosted Cloud Infrastructure - [GitHub](#) [GitHub](#)

Jun 2025 - Present

- Designed and managed a personal cloud by self-hosting Immich (a private photo backup open-source solution for all personal media assets) and Readeck (a web application to save, organize, and archive web content to read later) using Docker and Docker Compose. Configured NGINX and SSL to enable secure HTTPS access.

CERTIFICATIONS

- **AWS Cloud Technical Essentials:** Coursera
- **Red Hat OpenShift Administration:** MindCraft
- **Introduction to Programming Using Python:** MicroSoft
- **Data Science: R Basics (PH125.1x):** HarvardX

ACHIEVEMENTS

- **CityTrackWinner-MLH Civic Hackathon:** Built an AI-powered web app to assess sidewalk ADA compliance by fine-tuning computer vision model on 3,000 4K images and integrating Gemini API, winning \$500 City Track and Best usage of Gemini API.
